

BIOMEDICAL RESEARCH FOUNDATION
of Northwest Louisiana

POSITRON EMISSION TOMOGRAPHY IMAGING

MEDICAL DIRECTOR

Innovative, successful and growth oriented PET imaging center in NW Louisiana seeks an experienced Board Certified (NM) physician to replace its retiring Medical Director. Successful candidates must possess an entrepreneurial spirit and the experience to lead our PET centers to new levels in both its clinical and research activities.

The Foundation maintains a vigorous and well-respected PET practice, owning and operating three PET/CT scanners, an on-site cyclotron, and a radiochemistry laboratory. We have performed more than 20,000 scans since our 1995 inception, with a current volume of more than 300 scans per month. In addition to performing high-volume and high-quality clinical work, we are active in research in conjunction with LSU Health Sciences Center-Shreveport and radiopharmaceutical companies.

We offer:

- Active participation in and direction of PET/CT and related research opportunities
- Opportunity to teach NM fellows and residents
- An organization;
 - willing to support the development of your professional interests
 - interested in exploring new imaging and nuclear medicine opportunities
 - sensitive to the needs and demands of your personal life
 - located in an urban area with a great climate, rich cultural history, high quality of life and easy access to both large metropolitan centers and mother nature's wonders .

Please forward your CV and cover letter describing your background, qualifications and professional interests and goals to:
